

Teltonika Trackers

- [Setting up the Tracker](#)
- [Configuring in tT](#)

Setting up the Tracker

1. Power and Connect the Device
 1. Ensure your Teltonika device is powered on.
 2. Connect the device to your computer using a USB cable.
2. Install Teltonika Configurator
 1. Download the Teltonika Configurator for your specific device from the following link:
https://wiki.teltonika-gps.com/view/Teltonika_Configurator_versions
 2. Open the file 'Teltonika.Configurator.exe' once downloaded.
3. Reset Configuration
 1. In the Configurator, select your device from the main menu.
 2. From the top menu, choose 'Reset configuration' and then confirm.
4. Setup Settings
 1. GPRS:
 1. From the left menu, select 'GPRS'.
 2. Enter the APN details respective to your SIM card provider. You can find them here:
<https://www.solwise.co.uk/SIM-Card-APN-Settings>
 3. On the same page enter these server details:
Domain: api.trackingthis.com
Port: 8833
Protocol: UDP
 2. System:
 1. From the left menu, select 'System'.
 2. Under 'Data Protocol', select: Codec 8 (NOT Codec 8 Extended).
5. Save Settings
 1. From the top menu, select 'Save to device'.

Configuring in tT

1. Go to the vehicle asset.
2. Debug it, by clicking the asset image at the top left.
3. Select "Create new Object".
4. From the dropdown, select "Asset_Management01_Asset01_GPSLocation01" and submit.
5. Populate Name field as desired, for example "GPS".
Populate TrackerIMEI with the IMEI from your Teltonika tracking device and submit.
6. The vehicle should now have the GPS module within its history.
